

## METACOGNITION ACTIVITY

### Stage 4: lineal equations And fractional equations

**Directions:** In the following question you will reflect about what you learned during this stage and which things you need a reinforcement to improve your knowledge. Answer this with honesty and write a mark ✓ in each question

	Questions	Yes	No
Knowledge	1. I know how to identify a lineal equation		
	2. I know how to find the solution set of a linear equation:		
	3. I know how to isolate formulas:		
	4. I know the procedure to follow to solve fractional equations:		
	5. I know how to interpret the results of the problems of the daily life at the same context Using linear equations Using proportions		
Skills and abilities	1. I solve without difficult a linear equation with a variable:		
	2. I isolate without difficult, any variable in a linear equation:		
	3. In a problem applied to real life situations, I identify which are the data and which is my unknown variable:		
	4. When is necessary, when a problem is applied to the real life I can sketch a diagram to visualize the situation.		
	5. I can represent without difficult in a problem applied to the real life with the unknown variable using the linear equation.		
	6. I can get a solution in situation of the daily life.		
	7. I interpret the results of the problems in the daily life. Using linear equations Using proportions		
	8. I can solve fractional equations without difficult		
	9. I can know when is a extraneous solution in fractional equations.		
Actitudes y valores	1. I worked a lot in all the stage		
	2. I performed each activity from the stage		
	3. I used extra class time to study always Only some days		
	4. When I had doubts I read other books I used internet web I only read one book I did not do anything		
	5. I worked with my partners and I collaborate with the team When they asked me I got difficulties to understand		
	<b>Total scores</b>		

Points in which part of the light is the addition of the "yes" and consider that is the score is red is important to make a reflection cause is an opportunity area that you need to perform in the next stage.

Good	21 to 28	Regular	Between 11 to 20	Weak	Less than 10
------	----------	---------	------------------	------	--------------
